Re: Conductive Compounds, Inc., change of control notification

Dear Valued Customer:

I am very pleased to inform you that today, I have sold the assets of Conductive Compounds to Argential operating with the new trade name as *Applied Ink Solutions*, a wholly owned subsidiary of MicroChem Corp., Westborough, MA. As a result of this acquisition, our entire operation, including our talented staff, will move to MicroChem's state-of-the-art 76,000 SF facility in Westborough. The timing of that move is still to be determined. All of our established processes, standard operating procedures and equipment will remain unchanged.

MicroChem has strong chemical manufacturing and customer support competencies and a long, successful history serving many of the same end markets we do. MicroChem is also committed to finding new ways to bring value to our customers and the industries we serve. For those reasons, I know that MicroChem is a great fit for our customers and the CCI team, both of which have made our company the success that it is today.

While the name of the company will change to *Applied Ink Solutions*, the commitment to providing you with the highest quality engineered materials, and unsurpassed technical support and customer service will not.

I thank you very much for your business over the years and wish you all the best in the future. Should you have any questions or concerns and wish to speak with someone, please contact Tom Sutter at MicroChem Corp. at 617-831-2278.

Once again, thank you for making Conductive Compounds what it is today.

Sincerely,

Eileen Banfield  
President, Conductive Compounds, Inc.
